SiteIQ | Robot Management

EVERY ROBOT. ONE OPERATION.

FOR TEAMS THAT RUN CLEANING ROBOTS

Less managing. More cleaning. Results you can prove.

SiteIQ keeps cleaning on track across **every robot brand** you run, in one view. **Orin**, our AI agent, resolves what it can remotely and coordinates follow-up with our service team for the rest — while you see coverage, misses, and cost, every morning.

S-07 stopped at a blocked door. Orin sent your technician the location and two steps. **S-07 is back to work.**

WHAT IT DOES	WHAT YOU GET
One view of every robot, any brand	No more switching between manufacturer apps
Orin watches every robot and every task	Problems fixed before they cost you a missed task
Robot activity tied to your floor plans	Proof of what was cleaned, room by room
A dashboard and reports for each role	Operators, contractors and distributors each see what matters to them
Cost and ROI tracking	Expansion decisions backed by your own numbers

Hall B · this morning

Cleaning report · sent 07:45

2 of 3 rooms cleaned

Lobby 96% covered ✓ 06:12

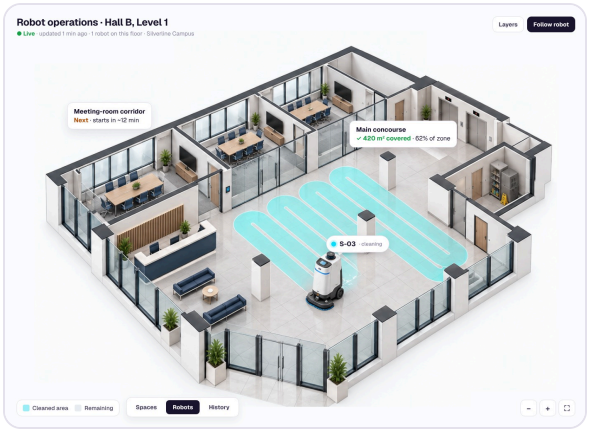

Lecture 201 98% covered ✓ 06:31

Lounge 214 12% · door blocked **Missed**

Orin asked facilities to clear the door and moved Lounge 214 to 13:30.

Proof, room by room. Every morning you see what the robots cleaned, what they missed, and what Orin did about it.

COVERAGE ON A MAP ANYONE CAN READ

See the coverage. Spot the gaps.

- **Completed** — every pass recorded on your floor plan, so coverage is measured, not assumed.
- **Missed** — areas that need attention, and why: a blocked door, a low battery, a skipped zone.
- **Follow-up** — Orin reschedules or sends a person, and the action is tracked to completion.

500+ commercial robots connected today

25–35% of routine floor cleaning handed to robots

90 days to show ROI on your own numbers

Start with one building. Prove it in 90 days. Then decide.
